PROJECTS

PayPay for Business (11/2021 - Present)

- PayPay for Business App which is a Universal merchant hybrid dashboard panel for both desktop and mobile devices and I mainly concentrate on the O2O sector which generates the revenue and handles features such as subscriptions, coupon creation and many more.
- Worked on developing and delivering new features/Ad hoc tasks every Quarter.
- Actively conduct code reviews for peers.
- Created Reusable Plug-in components.

HP (Configuration center) (06/2019 - 11/2021)

- I've had to re-architecture and migrate the existing project which was in Angular Js to Angular 10+.
- Implemented all the new/existing features and pages in Angular and API integration.
- Implemented localization to support multiple languages.
- Implemented custom filters to transform data based on multiple criteria.

HP (3D Service Center) (01/2020 - 05/2020)

- Implemented lazy loading for scalability and High performance.
- Developed all the UI/Features and API integration based on the requirement.
- Used server side pagination, search and filter for better performance and experience.

Takeda (04/2019 - 06/2019)

- Developed responsive admin dashboard to monitor the patients.
- Implemented interceptors for JWT Auth and encrypt/decrypt API's.
- Used server side pagination, search and filter for better performance and experience.
- Developed responsive quiz app that displays questions based on input data set.
